

Ban Ki-Moon has full responsibility for giving a way out for Animal Than Shwe

The so called successful negotiation on Burma crisis led by the UN Secretary General Ban Ki-Moon unleash the crazy dog Than Shwe from being remove from his position, the French ship is leaving Burma and American war ships are docking in Thailand because of this successful negotiation, all the threat are gone.

“UN Secretary-General Ban Ki-moon has said he is hopeful "a turning point" had been reached in tackling Burma's cyclone crisis.”

The real turning point is Than Shwe, his animal gang got the upper hand, and now they are harassing and bullying individual donors who want to help survivors. Right now, Rangoon is under heavy rain and many people will get pneumonia.

Now, foreign threat is gone and the Burmese military regime made two dishonest steps without hesitation:

1. Burnt down the Burmese embassy's visa section in Bangkok, which mean to delay the visa process for the foreign NGOs and experts to enter Burma to help cyclone victims. The regime promised to the UN Secretary General Ban Ki-Moon and said there would be no restriction on NGOs and foreign donors who want to help but in reality, it is very hard to get inside Burma and even if they arrived to Rangoon, they could not go to the hard hit regions. It said many foreigners' passports were burnt too, without their passport the foreigners have no choice to enter Burma. It is a blunt dirty trick.

The regime has been lying to its people for their entire life and now they are lying to the UN Secretary General and Ban bought it easily. Similarly, they tricked and used UN special envoy Razali Ismail to buy time by saying that they would start a dialogue with the opposition soon, but it never happened and not long ago, UN Secretary-General's special adviser on Burma, Mr. Gambari, failed to negotiate. Finally, Ban Ki-Moon turns arrived. The highest-ranking UN officials have been used for their own benefit, and Ban Ki-Moon allowed it to happen.

2. The regime thought that there is no threat, they are now recklessly blocking the local NGOs to go to the cyclone hit areas and captured private donors' trucks and confiscated the donation foods and stuffs. The army is labeling all the foodstuffs as their donations. In addition, Foreign NGOs are really struggling to go into the hard hit region where people are in need of food and medicine.

I think Ban Ki Moon has a full responsibility to get it straight. If the SPDC does not comply with their promise and continue to block the food, medicine and people, UN Secretary General has to give a green light to the US marines to go inside Burma and kill all the animals, after finish the job they can peacefully manage to help the survivors.

US, France, Great Britain need to go inside Burma Now!

We need invasion, Invasion first, and help the victims later. I strongly believe that if the regime still exists, we do not have a chance to help our people.
